

## Summer Newsletter 2019

### Biology News:

All freshmen will be taking Biology during the 2019 - 2020 school year. The Biology team of Lisa Popelka, Kelly Lewis, & Elle Stigler will be implementing a “flexed-grouping” approach this school year. What that will look like for your student, is a personalized learning experience; they will understand how they learn best; focus on skills, content, and areas of extension tailored to their needs and interests. These experiences will turn the learning over to the students, allowing them a chance to take ownership of that learning and ultimately their successes. In addition, it will provide an authentic chance for students to gain ‘soft skills’ such as self-awareness, timeliness, organization, and the ability to effectively collaborate. In order to be prepared for Biology, the students will need the following:

- 1” 3 ring binder
- Blue or Black Pens
- Pencils
- Colored Pencils
- Earbuds

We are looking forward to meeting your student in the fall!
