

MARCH

WHAT WE ARE LEARNING THIS MONTH

Economics

- 1) Addition & Subtraction
(continued)
- 2) Fosnot: Ages & Timelines

Writing to Persuade

Learning

NED Awards

Ellie has been actively thinking about the math teaching and is using a lot of mental math strategies where she does not need her fingers to add or subtract!

Gianna always has such a positive attitude and loves school and learning.

Miscellaneous

- **Conferences**

Thank you so much for joining us for conferences. We enjoyed being able to share your child's progress and growth in second grade.

- **Amanda Desua (Guidance Lesson)**

Amanda Desua (district guidance counselor) meets with classes each month. Her March focus for second grade is calming strategies and mindfulness. Students are learning different breathing techniques and calming strategies that can be implemented when experiencing something difficult. Check out the students memes that they created on Seesaw. Mindfulness techniques where we tap into our senses as a biological way of calming down are utilized as well.

- **A New Trimester**

We cannot believe that we are into the third trimester already! Report cards will be available for families to access on March 19th.
