

Art Newsletter September 2020

Welcome back to a very different but wonderful year of school! I am so excited to help your students explore famous artists and discover artwork created around the world. Each student will have one specials class for 50 min each day for a whole week and then we will rotate specialists. This gives us a wonderful amount of time to complete projects!

For the first few weeks we talked a lot about emotions and students made drawings that reflected their personalities. We had a lot of fun!

Portraits

Some students folded a paper in a certain way that allowed them to draw themselves wearing a mask, but then when they opened it up we got to see their fabulous faces. They even surrounded themselves with positive words that describe them!

Other students decided to explore the world of self-portraits by making themselves into Minecraft characters, anime characters, cartoon characters and even did their best to make themselves look as realistic as they could.

Other classes had a blast with emojis and drawing themselves on crayons!
